

AVer EZDraw

Collaborative Software

AVer's EZDraw app is a cutting-edge tool for collaborative communication on AVer's EVC300 and EVC900 video conferencing systems. Available for either Android tablets or iPads, EZDraw lets EVC300 and EVC900 users draw, write and highlight on either a shared desktop or shared virtual interactive whiteboard, making it even easier to share ideas, discuss proposals and build consensus with colleagues too far away for face to face meetings. Edited images can be easily saved in the popular PNG format, allowing you to keep an easily-accessible record of the discussion process.

Free for iOS and Android tablets

No learning curve

Turn communication into collaboration
