

# COLLABORATE® Space

COLLABORATE Space is a powerful cloud-based video collaboration application with a full suite of audio, video, and meeting tools in a persistent space. Comes with everything for online meetings, including messaging, integrated file sharing, whiteboarding, annotation, meeting minutes, scheduling, and more.

### Richer Collaboration with MS Teams

Users can create searchable, persistent private and public channels, organized by topic, which can include messages, documents, whiteboards, session recordings, and more.

- > Make calls to landlines & mobile phones, and bridge to other COLLABORATE Space participants.
- > Pro and Enterprise users enjoy video meetings with up to 100 participants - as many as 49 shown on-screen at one time.
- > Includes unique, user-friendly interface that's intuitive and simple to use.
- > Runs on any device – mobile, desktop, and all ClearOne COLLABORATE Live room systems.
- > Web RTC users can easily join full-featured audio & video meetings using browser with no additional downloads or plugins.
- > Recording permissions controlled by host.
- > Easily reach out to colleagues, business partners or customers who are using COLLABORATE Space by inviting them to share their Space contact information.
- > Includes gateway software for interoperability with traditional H.323 and SIP systems.
- > Architecture designed from the ground up to safeguard users from full range of security vulnerabilities sometimes found on other cloud-based solutions.
- > After each session, email summary sent to host with topic, participant attendance, and duration of each participant in the session.
- > Supports up to 3 displays – one for local participants, one for remote participants, and one for content sharing.
