Better Video & Audio Quality

The new architecture of the core forwarding element and compatible access gate

Yealink Meeting

Video Quality, Clarity Optimized

- Together with SVC subscription of adjustable definition, well improve the audio and video experience.

Audio Improvement, Noise Suppression

- Optimized Duplex
- Smart noise suppression, including four levels (default noise-canceling, low for light noise, medium for CPU or pen writing noise, and high for keyboard lockout or barking), can detect and filter the noise automatically, ensuring a frictionless audio experience even in some noisy spaces.
