Teamline by StarLeaf

Teamline premium meeting room systems are native to Skype for Business and Microsoft Teams and are all you need to deliver collaborative meetings and uninterrupted workflows in a Microsoft environment. All systems register directly with Skype for Business and/or Office 365, and require no additional infrastructure. Across the range users experience the same stunning UI with one button to join, wireless content sharing, and unparalleled ease of use in meeting spaces of all sizes. Teamline meeting rooms are centrally managed by Teamline's management platform - Maestro to ensure a low total cost of ownership and quality of service.

Teamline 5140

Teamline 5140 for all small to medium meeting spaces.

The award-winning Teamline 5140 is a flexible native meeting room solution available in four options, allowing you to address the needs that are specific to your organization. Featuring the same familiar user interface that mirrors the Skype for Business experience, employees know how to create and join video meetings instinctively. With a wide range of camera, screen and wireless content sharing options, the Teamline 5140 makes all your Microsoft meetings highly professional, on-time and more productive.

Teamline 5250

Teamline 5250 AV integrator and boardroom solution.

This great quality and easy to use native solution for Skype for Business and Microsoft Teams is designed to slot into video conferencing suites that demand multiple screens, microphones, professional cameras, and full AV integration.

Teamline 5250 is a fully featured, enterprise room system, with exceptional video and audio quality that offers a familiar experience from desktop to meeting room. Registering directly with the Skype for Business server and/or Office 365, this is the only fully managed native solution that integrates with professional audio and video devices and third party control systems.

- Best price performance

Teamline Management Platform - Maestro

The smart way to manage your Teamline meeting rooms.

The Teamline management platform – Maestro gives administrators all they need to centrally manage and control their Teamline meeting rooms. It allows you to monitor room utilization, improve meeting room efficiency, and provide remote support on a global basis.

Available via Microsoft Azure or on-premise, Maestro is the key to easy management, reducing system downtime and lowering cost of ownership.

A dashboard provides a wealth of information including the current status of all active rooms, instant access to call detail records, analytics and reporting, as well as advanced firmware management and fast provisioning.
