Plug your 3.5mm audio plug of audio cable into the RX2's audio jack and another side connects to "Audio In" of your audio speaker, home stereo, car stereo, PA systems, voice recorder or headphone. Then, you can listen and enjoy audio or voice wirelessly.

LiveMIC2

"Speaker"

voice

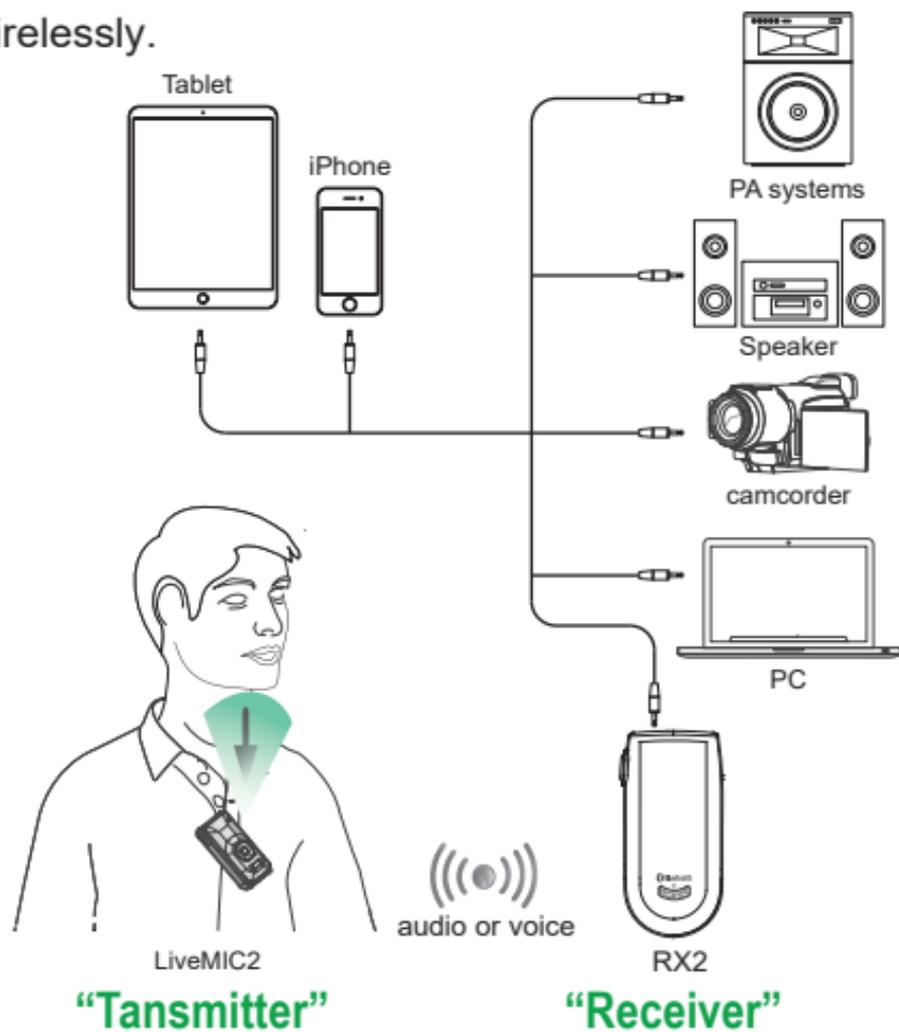

RX2

"Listener"

Using for listening or recording remote voice

Connect to audio output of RX2 to speakers or iPad/iPhone to listen or record remote voice wirelessly.

Using microphone on LIVEMIC2

The LiveMIC2 supports internal and external microphone

◆ Using internal Uni and Omni directional microphone

Put LiveMIC2 close to the source of the sound within 8 inches to captured the best sound quality.

Press the microphone select button, the correspond internal microphone will be used.

Uni Mic Switch

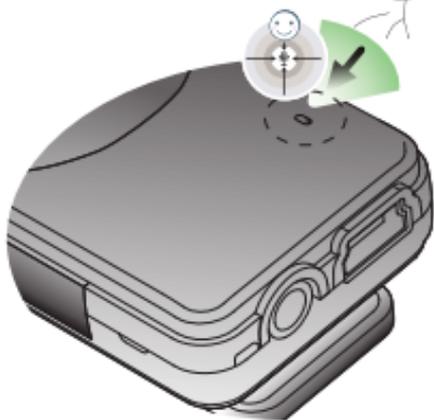

Omni Mic Switch

- Both unidirectional and omnidirectional microphones have their advantages and disadvantages. The important thing is to know the application of the microphone in use to know which would be better for the given situation around.

-  Unidirectional (Cardioid) microphone is used that the target sound source pick up directly in front of the microphone, and all other sounds from sides are largely rejected.

-  Omnidirectional microphone will pick up sound from all directions or sides around the microphone. Users can speak into any side of the microphone.

 Unidirectional

 Omnidirectional

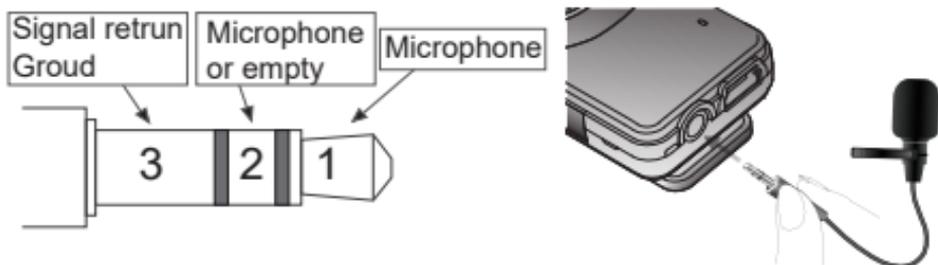

◆ Using external microphone

Plug the 3.5mm audio plug of external microphone into the LiveMIC2 audio jack and select the external MIC on the select button. LiveMIC2 will disable internal MIC and use the external MIC for sound capturing.

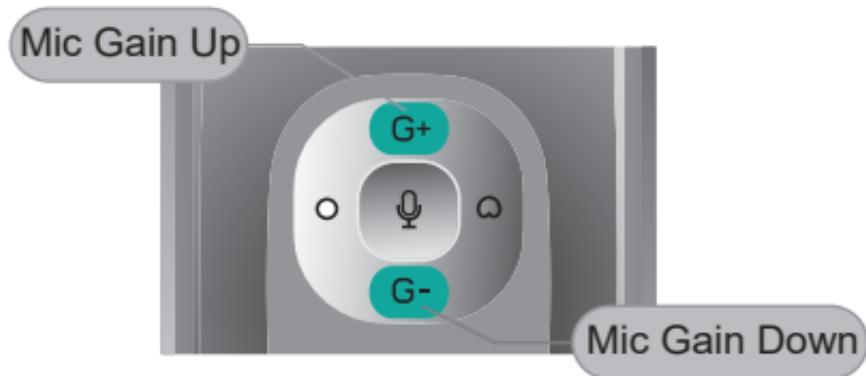

External Mic Switch

- This type of external microphone is suitable for LiveMIC2

Adjust microphone gain and mute LiveMIC2

The G+/G- buttons is used to adjust the microphone input gain. Each microphone gain can be adjusted when it is using, and the gain will be stored after setting.

- **G+ and G- :** Single press to increase and decrease the microphone gain.
- **Mute:** Press and hold the G- for about a second to mute the microphone, then to press the G+ to unmute.

Adjusting the RX2 audio volume

- **To increase the audio volume**

While listening audio, click the ON/OFF button once to increase the volume by one step. Repeat this procedure until you reach the desired level.

- **To decrease the audio volume**

While listening audio, quick click the ON/OFF button two times continuously to decrease the volume by one step. Repeat this procedure until you reach the desired level.

Reduce audio delay with FastStream

The LiveMIC2 and RX2 support low latency audio with FastStream.

VISUAL INDICATION

The POWER/MODE/AUDIO LED can also indicate the status of LiveMIC2 and RX2 working statuses.

Statues	Indication
